

Dear UES parents,

Some great news! The UES Student Council has been offered the opportunity to benefit from a company that recycles household electronics. The founder of OrangeCycle is one of our parents and she has offered to donate the proceeds from these recycling efforts to school programs that benefit all our school's children. Each collection cycle will have the money go to a specific program in which all students can enjoy.

**Here's how you can help:**

- Bring in any unused or broken electronics and place them in the secure bins located in various places around the school

**How's this helping?**

- Protects the environment from incorrect discarding of items
- Uses less natural resources for new electronics
- Donates money to UES programs

**Here are some suggestions for items to be recycled:**

- Mobile phones and PDAs
- GPS devices
- Satellite radios
- LCD monitors
- Laptops and desk top computers
- Camcorders, MP3 players, and iPods
- Gaming consoles, Nintendo DS, and Sony PS3
- DVD and BluRay players
- Projectors and Home Audio Systems
- Digital Cameras
- Calculators, CDs, or DVDs

\*Note: These items can be in either working or non-working order. All personal information on these items will be destroyed the moment the items reach the recycling plant. For more information, go to [www.orangecycle.org](http://www.orangecycle.org).

Student Council is collecting items all year, and the more electronics that are collected means the more proceeds that go to the UES. So bring as much as you wish. Large items can be collected privately.

Thanks for your support,

5<sup>th</sup> Grade Student Council
