

The **MATHCOUNTS MISSION** is to increase enthusiasm and enhance math achievement for middle school students throughout the United States.

MATHCOUNTS CLUB

The **MATHCOUNTS Club** begins mid-November and runs through February. Sessions are announced mid-November on NHS Middle School News. Problems are challenging for 7/8 graders; however, 6th graders are encouraged to attend and may participate at competition. Weekly sessions engage students in logic, algebra, geometry, and business mathematics. Algorithms matter, but intuition, estimation, and deductive and constructive reasoning along with common sense are important factors for solving many problems.

The **MATHCOUNTS Club** will meet once a week on **Tuesday** after school from **2:30 to 3:30** in **Mrs. Chuma's room 702**.

MATHCOUNTS COMPETITION SERIES

Students enrolled in the sixth, seventh or eighth grade are eligible to participate in the **MATHCOUNTS Competition Series**. All MATHCOUNT club students are invited to participate in the school-level competitions, which take place in December or January and are run by the Competition Coaches. These sessions also serve to prepare interested students for the **Regional Competition**.

The **MATHCOUNTS Competition Series** is ideal for students who have a **talent** and **passion** for math. Students will engage in challenging "bee-style" contests in which they will compete against and alongside other bright, motivated students.
